Understanding the Types of Interview Questions

- **Behavioral Questions (e.g., "Tell me about a time you failed"):** **These explore your past actions**

and how you handled specific situations. Focus on the STAR method (Situation, Task, Action, Result). • Situational Questions (e.g., "How would you handle a challenging client"): **These assess how you'd react in a hypothetical scenario. Outline your approach, considering ethical considerations and potential consequences.** • Technical Questions (e.g., "Explain your understanding of Agile methodology"): *These probe your knowledge and expertise in the field. Practice explaining complex concepts in simple terms.* • Competency-Based Questions (e.g., "Describe your problem-solving skills"): **These questions aim to evaluate specific abilities relevant to the role. Provide concrete examples illustrating your proficiency.**

The Power of the STAR Method

The STAR method is a powerful framework for answering behavioral questions: | Element | Description | Example | ||| | Situation | **Briefly describe the context or situation you were in.** | "During a recent project at Acme Corp..." | | Task | **Clearly define the task or objective you were responsible for.** | "...my task was to streamline the workflow in the marketing department..." | | Action | *Detail the specific steps or actions you took to address the situation or complete the task. Be precise and specific about your contributions.* | "...I identified bottlenecks in the process, implemented a new software program, and delegated tasks to free up team members..." | | Result | **Clearly articulate the positive outcomes or results of your actions. Quantify your results whenever possible.** | "...The new workflow reduced processing time by 20%, and we achieved a 15% increase in productivity." |

Case Study: Sarah's Interview Preparation

Sarah, a recent graduate applying for a marketing role, meticulously studied common interview questions. However, instead of memorizing responses, she analyzed her experiences in volunteer work and part-time jobs. She crafted narratives using the STAR method, focusing on specific achievements and learnings. This approach enabled her to answer questions with conviction and authenticity, ultimately leading to an offer.

Practical Examples and Demonstrations

(Table showcasing different question types and example answers using the STAR method) | **Question Type** | **Question** | **Example Answer (using STAR)** | ||| | **Behavioral** | "Tell me about a time you failed." | "In my previous role at XYZ, I spearheaded a campaign that didn't generate the expected response. [Situation] My strategy was to focus on a specific target demographic. [Task] I missed the crucial step of surveying potential audience interests and preferences. [Action] I analyzed the data post-campaign, identified the gap in my strategy, and communicated the findings to my manager. [Result] This led to valuable insights and a refined strategy for future campaigns." | | **Situational** | "How would you handle a challenging client?" | "I'd prioritize active listening to understand the client's concerns. [Action] I would also document every conversation and key data points. [Action] Then, I'd propose a structured problem-solving approach that balances the client's needs with the company's resources. [Action] I'd follow up regularly to update them on progress and anticipate and address concerns. [Result] This client-centric approach ultimately fosters trust and a long-term relationship." |

Conclusion

Mastering the interview process is not about memorizing responses, but about showcasing your skills, experiences, and personality. Authenticity, coupled with a well-structured approach like the STAR method, allows you to connect with interviewers on a deeper level. The "Tell Me About Yourself" Opener: Your Professional Snapshot

How to Approach It:

Think of this as your 60-second commercial. Structure your answer using the "Past, Present, Future" model: ****Past:**** Briefly touch upon your previous roles and key experiences that led you to where you are today. Highlight transferable skills and significant achievements. ****Present:**** Describe your

current role and responsibilities, emphasizing what you're doing now that aligns with the job you're interviewing for. **Future:** Explain why you are interested in *this specific role* and *this company*, and how your aspirations fit with their opportunities.

Example Answer:

"I've spent the last five years in marketing, primarily focusing on digital strategy and content creation for B2B SaaS companies. In my previous role at [Previous Company], I was instrumental in developing and executing campaigns that increased lead generation by 30% and website traffic by 25%. Currently, I'm a Senior Marketing Specialist at [Current Company], where I manage a team responsible for our social media presence and email marketing efforts. I'm particularly drawn to this [Job Title] position at [Company Name] because of your innovative approach to [Specific Company Project/Value] and the opportunity to leverage my expertise in [Skill relevant to the job] to contribute to your continued growth in the [Industry] sector."

Behavioral Interview Questions: Proving Your Skills with Examples

These questions are designed to understand how you've handled specific situations in the past, believing that past behavior is a strong predictor of future performance. They often start with phrases like "Tell me about a time when..." or "Describe a situation where..."

The STAR Method: Your Secret Weapon

The STAR method is the most effective way to answer behavioral questions. It provides a structured and comprehensive response: **S - Situation:** Briefly describe the context of the situation. **T - Task:** Explain the goal you were working towards. **A - Action:** Detail the specific steps you took to address the situation. **R - Result:** Share the positive outcome of your actions, quantifying it whenever possible.

Common Behavioral Questions and How to Answer Them:

1. "Tell me about a time you faced a challenging project and how you overcame it."

Focus: Problem-solving, resilience, initiative. **Example Answer (STAR):** **Situation:** "In my previous role as a project manager, we were tasked with launching a new product within an aggressive six-week deadline. A key supplier unexpectedly went out of business, threatening our production timeline." **Task:** "My task was to find a new, reliable supplier and secure the necessary components without delaying the launch." **Action:** "I immediately began researching alternative suppliers, leveraging my network and conducting thorough due diligence. I negotiated terms with a promising new vendor, expedited their production process, and personally oversaw the initial shipment to ensure quality and timeliness. I also worked with my team to reallocate resources and adjust our internal production schedule to absorb any minor delays." **Result:** "Despite the setback, we successfully secured a new supplier and launched the product on schedule, exceeding our initial sales targets by 15% in the first quarter."

2. "Describe a time you made a mistake at work. What did you learn from it?"

Focus: Self-awareness, accountability, learning and growth. **Example Answer (STAR):**

****Situation:**** "Early in my career as a junior developer, I overlooked a critical detail in a client's specifications for a new feature." * ****Task:**** "The goal was to implement the feature exactly as requested to ensure client satisfaction." * ****Action:**** "When the client pointed out the discrepancy, I took immediate responsibility. I apologized for the oversight, thoroughly reviewed the specifications again, and then worked overtime to correct the code and implement the feature correctly, ensuring it met all their requirements. I also implemented a new personal checklist for all future coding tasks to prevent similar errors." * ****Result:**** "The client appreciated my promptness and commitment to rectifying the mistake. More importantly, this experience taught me the invaluable lesson of meticulous attention to detail and the importance of having robust personal quality control measures in place."

3. "Tell me about a time you had to work with a difficult colleague."

* ****Focus:**** Interpersonal skills, conflict resolution, teamwork. * ****Example Answer (STAR):**** * ****Situation:**** "I was part of a cross-functional team working on a critical marketing campaign, and one colleague, [Colleague's Role], consistently held back on sharing information and was often dismissive of others' ideas." * ****Task:**** "Our collective goal was to deliver a successful campaign, and their behavior was creating friction and hindering progress." * ****Action:**** "Instead of confronting them directly in a group setting, I initiated a one-on-one conversation. I asked open-ended questions to understand their perspective and actively listened to their concerns. We then collaboratively agreed on clearer communication protocols and established regular check-ins." * ****Result:**** "Our working relationship improved significantly. The colleague became more engaged, openly shared their insights, and the team's overall productivity and morale increased, leading to the campaign exceeding its KPIs."

4. "Describe a time you had to persuade someone to see your point of view."

My proposal for Feature A was initially met with resistance from a senior team member who favored Feature B." * ****Task:**** "My task was to build consensus and convince the team, including the senior member, that Feature A was the more strategic choice for long-term customer acquisition." * ****Action:**** "I prepared a detailed presentation outlining the market research, projected ROI, and long-term benefits of Feature A. I also acknowledged the merits of Feature B and presented data showing how Feature A would directly address a larger unmet customer need. I invited questions and actively listened to their counterarguments, addressing each one with supporting evidence. I highlighted how Feature A could potentially complement Feature B down the line." * ****Result:**** "After reviewing the data and considering my points, the team, including the senior member, agreed that Feature A was the right priority. This not only secured the successful development of a high-impact feature but also strengthened trust and open dialogue within the team."

Situational Interview Questions: Testing Your Problem-Solving in Real-Time

These questions present hypothetical scenarios, asking how you *would* handle them. They assess your judgment, critical thinking, and decision-making abilities.

How to Approach Them:

Similar to behavioral questions, a structured approach is key. Think through the problem logically and outline your steps.

Example Questions and Answers:

1. "Imagine you have multiple urgent tasks with competing deadlines. How do you prioritize?"

* **Focus:** Time management, prioritization, organizational skills. * **Example Answer:** "My first step would be to assess each task's urgency and importance. I'd consider factors like: Who is the stakeholder? What is the impact of missing the deadline? What are the dependencies? I would then categorize them into urgent and important, important but not urgent, urgent but not important, and neither. If I'm still unclear, I wouldn't hesitate to communicate with my manager or relevant stakeholders to clarify priorities and expectations. If possible, I'd also look for opportunities to delegate or break down larger tasks into smaller, more manageable components."

2. "What would you do if you disagreed with your manager's decision?"

* **Focus:** Professionalism, communication, conflict resolution. * **Example Answer:** "My approach would depend on the nature of the disagreement and its potential impact. First, I would ensure I fully understand the rationale behind my manager's decision. If I still have concerns, I would schedule a private meeting to respectfully express my perspective. I'd come prepared with data or evidence to support my viewpoint, focusing on the potential business implications rather than personal opinions. Ultimately, I would strive for a constructive dialogue and trust my manager's final decision, even if it differs from my own recommendation, as they have a broader view of the team's objectives."

Final Thoughts: Practice Makes Perfect

Preparing for job interview questions is an ongoing process. The more you practice, the more confident and articulate you'll become. Rehearse your answers aloud, ideally with a friend or family member who can provide feedback. Remember to be authentic, enthusiastic, and professional. With the right preparation, you can transform those nerve-wracking questions into opportunities to impress and land your dream job. Good luck!

Job Interview Questions with Answers: Mastering the Art of Professional Conversation The job interview remains one of the most pivotal moments in a candidate's career journey—where qualifications are assessed, cultural fit evaluated, and potential truly revealed. While technical skills and experience lay the foundation, it is the ability to articulate thoughts clearly, respond thoughtfully, and project confidence that often makes the difference. Understanding the most common interview questions and crafting compelling answers is not just about memorization; it's about developing a genuine, authentic presence under pressure.

The Evolution of Interview Questions: From Rigidity to Real-World Readiness

Historically, job interviews were structured around a rigid set of standardized questions, designed to minimize bias and evaluate basic competencies. However, modern hiring practices have evolved significantly, emphasizing behavioral and situational inquiry that reflects real workplace dynamics.

Today's employers seek candidates who demonstrate not only what they know, but how they think, collaborate, and adapt. This shift means interviews now often explore past experiences, problem-solving approaches, emotional intelligence, and long-term career aspirations. Recognizing this evolution helps job seekers move beyond surface-level answers and instead share meaningful, context-rich responses that showcase genuine capability.

Essential Question Categories and Insightful Responses

One of the most prevalent categories of questions focuses on behavioral experiences, often framed through the STAR method—Situation, Task, Action, Result. This framework encourages structured, evidence-based storytelling. For example, when asked, “Tell me about a time you faced a major challenge at work,” a strong answer might describe a high-pressure project, the specific responsibility assigned, the strategic steps taken, and the measurable outcome achieved. This approach not only demonstrates competence but also reveals resilience, initiative, and practical judgment. Another common area involves values alignment and cultural fit. Questions like, “Why do you want to work here?” require candidates to research the organization deeply and articulate genuine interest. The best responses connect personal values—such as innovation, collaboration, or integrity—with the company’s mission and culture. This shows not just suitability, but enthusiasm and long-term commitment. Technical and role-specific questions remain crucial, especially in specialized fields. For instance, a software developer might be asked to explain

how they debug complex code or design scalable systems. Here, clarity and precision matter—avoiding jargon while demonstrating deep understanding helps build credibility. It’s often beneficial to reference past projects or experiments, offering concrete examples that illustrate both technical depth and creative thinking. Interpersonal dynamics and soft skills are increasingly scrutinized. Responses to questions like, “Describe a time you disagreed with a colleague,” should highlight communication skills, empathy, and conflict resolution. The key is to focus on collaboration rather than confrontation, emphasizing how differing perspectives led to better outcomes. This shows emotional maturity and teamwork readiness—qualities highly prized in modern workplaces.

Applying Interview Answers to Real-World Success

Crafting thoughtful answers is not about performance—it’s about preparation. Candidates who proactively reflect on past experiences, align their stories with organizational needs, and practice articulating key moments consistently perform with greater confidence and authenticity. Mock interviews with peers or mentors can help refine delivery, reduce nervousness, and uncover gaps in storytelling. Furthermore, tailoring responses to specific roles and companies ensures relevance and demonstrates genuine interest. Beyond immediate interviews, mastering these

conversations builds lasting professional skills. The ability to communicate clearly, listen actively, and adapt to unexpected questions translates seamlessly into leadership, team collaboration, and continuous learning—cornerstones of career advancement.

The Future of Job Interviews: Innovation and Authentic Connection

As artificial intelligence and virtual interviews gain traction, the core of job interviews continues to center on human connection. While technology streamlines initial screenings, employers increasingly prioritize authenticity, emotional intelligence, and cultural alignment—elements that machines struggle to assess. The future belongs to candidates who can balance structured responses with genuine personality, demonstrating not just competence, but passion, adaptability, and integrity. In this evolving landscape, preparation remains key. By understanding the underlying principles behind common questions, practicing thoughtful answers, and embracing self-awareness, job seekers position themselves not just as candidates, but as compelling professionals ready to thrive in any workplace. The interview is no longer a single event—it's a conversation that opens doors to long-term professional growth.

Common Job Interview Questions and How to Ace Them

Let's dive into the most frequently asked interview questions and explore effective strategies for answering them.

1. "Tell me about yourself." (The Opener)

This is your elevator pitch opportunity. Don't recite your resume. Instead, focus on a concise narrative that highlights your relevant experience, skills, and career aspirations, connecting them directly to the position you're interviewing for. Aim for a 1-2 minute response.

What the interviewer wants to know: Your background, your key selling points, and how you see yourself fitting into the role.

Strategic Answer Framework:

1. Present: Briefly describe your current role and

responsibilities, emphasizing accomplishments.

- 2. Past: Highlight relevant past experiences and skills that have prepared you for this opportunity.**
- 3. Future: Connect your past and present to why you're excited about *this specific role* and how you can contribute.**

Example: "I'm a highly motivated marketing professional with five years of experience in developing and executing successful digital marketing campaigns for SaaS companies. In my previous role at TechSolutions, I led a team that increased lead generation by 30% through targeted content marketing and SEO strategies. I'm particularly drawn to [Company Name]'s innovative approach to [specific industry challenge] and believe my expertise in [relevant skill, e.g., data-driven campaign optimization] would be a valuable asset to your team."

2. "Why are you interested in this role/company?" (The Motivation Checker)

This question gauges your genuine interest and whether you've done your homework. Generic answers won't cut it. Research the company's mission, values, recent achievements, and challenges. Connect these to your own career goals and passions.

What the interviewer wants to know: Your research efforts, your alignment with the company's values, and your enthusiasm for the specific opportunity.

Strategic Answer Framework:

- 1. Company Aspects:** Mention specific things you admire about the company (e.g., their innovative products, their commitment to sustainability, their strong team culture).

I'm particularly drawn to your commitment to [company value, e.g., fostering a collaborative work environment], which resonates deeply with my own working style. This role, with its focus on [key responsibility], presents a fantastic opportunity for me to leverage my skills in [relevant skill] while contributing to a company that is clearly at the forefront of [industry]." *Crucially, tailor this with specific details.*

3. "What are your strengths?" (The Value Proposition)

This is your chance to highlight your most relevant skills. Don't be arrogant, but be confident. Back up your stated strengths with specific examples and quantifiable achievements.

What the interviewer wants to know: Your key abilities and how they will benefit the company.

Strategic Answer Framework:

- 1. Identify 2-3 relevant strengths: Choose strengths that are explicitly mentioned in the job description or are generally highly valued in the industry (e.g., problem-solving, communication, leadership, technical proficiency, adaptability).**
- 2. Provide concrete examples: For each strength, share a brief, specific story that illustrates it in action and resulted in a positive outcome.**

Example: "One of my key strengths is my ability to [strength, e.g., analyze complex data and translate it into actionable insights]. For instance, in my previous role, we were facing declining customer engagement. I analyzed user behavior data, identified key drop-off points, and recommended a series of targeted content improvements, which led to a 15% increase in user retention within three months. I'm also highly skilled in [another strength, e.g., cross-functional collaboration], which I believe is essential for success in a team-oriented environment like this one."

4. "What are your weaknesses?" (The Self-Awareness Test)

This is a classic trick question. The goal isn't to find a flaw, but to assess your self-awareness, honesty, and willingness to improve. Avoid clichés like "I'm a perfectionist" or "I work too hard." Choose a genuine

weakness that you are actively working to overcome.

What the interviewer wants to know: Your self-awareness, honesty, and commitment to personal growth.

Strategic Answer Framework:

- 1. Choose a genuine weakness: Select something that is real but not a deal-breaker for the role.**
- 2. Explain how you are addressing it: Detail the steps you are taking to mitigate or improve upon this weakness.**
- 3. Frame it positively: Show that you've learned from it and are committed to improvement.**

Example: "In the past, I sometimes found it challenging to delegate tasks, as I wanted to ensure everything was done to my exact standards. However, I've learned that effective delegation is crucial for team productivity and my own efficiency. I've actively worked on this by [specific action, e.g., taking a leadership training course and practicing assigning tasks with clear instructions and check-ins], which has not only improved my team's output but also allowed me to focus on more strategic initiatives."

5. "Where do you see yourself in 5 years?" (The Future Vision)

Interviewers want to see if your long-term goals align with the career path the company can offer. Show ambition and a desire for growth, but ensure your vision is realistic and tied to the industry.

What the interviewer wants to know: Your career ambitions, your commitment to the industry, and whether you're likely to stay with the company long-term.

Strategic Answer Framework:

- 1. Focus on growth and learning: Express a desire to deepen your expertise and take on more responsibility.**
- 2. Align with the company's trajectory: Show that you see yourself growing *within* their organization.**
- 3. Be specific but not overly rigid: Avoid declaring you want to be CEO, but indicate a path towards leadership or specialized expertise.**

Example: "In five years, I see myself as a senior contributor in my field, having deepened my expertise in [specific area relevant to the role]. I'm eager to take on more complex projects, mentor junior team members, and contribute to strategic decision-making. Ideally, I would be leveraging the opportunities for professional development at [Company Name] to grow within a role similar to this one, perhaps taking on more leadership responsibilities as the company continues to expand in the [industry] sector."

**6. "Describe a challenging situation and how you handled it."
(The Problem-Solver)**

This is a behavioral question designed to assess your problem-solving skills, resilience, and ability to learn from difficult situations. Use the STAR method

(Situation, Task, Action, Result) to structure your answer.

What the interviewer wants to know: Your ability to handle pressure, your critical thinking, and your positive outcomes.

Strategic Answer Framework (STAR Method):

- 1. Situation: Briefly describe the context of the challenging situation.**
- 2. Task: Explain the goal you needed to achieve or the problem you needed to solve.**
- 3. Action: Detail the specific steps you took to address the situation. Focus on *your* actions.**
- 4. Result: Describe the outcome of your actions. Quantify it if possible and highlight what you learned.**

Example: "Situation: In my previous role, we were facing a critical project deadline, and a key team member unexpectedly had to take a leave of absence. Task: My task was to ensure the project remained on track without compromising quality. Action: I immediately reassessed the remaining tasks, redistributed the workload among the remaining team members, and took on some of the critical responsibilities myself. I also proactively communicated with stakeholders about the situation and our revised timeline. Result: While it was a challenging period, we successfully delivered the project on time and to the client's satisfaction. This experience taught me the importance of adaptability,

strong team communication, and efficient task management under pressure."

7. "Why are you leaving your current/previous job?" (The Transition Question)

Be positive and professional. Never badmouth former employers or colleagues. Focus on your desire for growth, new challenges, or a better alignment with your career goals.

What the interviewer wants to know: Your reasons for moving on and if those reasons might indicate future dissatisfaction with their company.

Strategic Answer Framework:

- 1. Focus on future opportunities: Frame your departure as a step towards a more suitable role or a chance to learn new skills.**
- 2. Avoid negativity: Do not complain about your previous job, boss, or colleagues.**
- 3. Be honest, but diplomatic: If you were laid off, state it factually and briefly.**

Example: "While I'm grateful for the opportunities and experience I gained at [Previous Company], I'm now seeking a role that offers more direct involvement in [specific aspect of the new role] and allows me to further develop my skills in [relevant skill]. This position at [Company Name] aligns perfectly with those aspirations."

8. "Do you have any questions for us?" (The Engagement Indicator)

This is your last opportunity to show your engagement and initiative. Always have questions prepared. Asking thoughtful questions demonstrates your interest and shows you've been actively listening.

What the interviewer wants to know: Your level of engagement, your critical thinking, and your genuine interest in the role and company.

Strategic Question Categories:

- 1. Role Specific: "What does a typical day look like in this role?" "What are the biggest challenges someone in this position might face?"**
- 2. Team/Culture: "How would you describe the team dynamic?" "What are the company's core values in practice?"**
- 3. Company Growth/Future: "What are the company's strategic goals for the next year?" "What are the opportunities for professional development within the company?"**
- 4. Performance/Success: "How is success measured in this role?" "What are the key performance indicators (KPIs) for this position?"**

Example Questions:

- 1. "What are the biggest opportunities for growth within this department over the next 1-2 years?"**
- 2. "How does the company support professional**

development and continuous learning for its employees?"

- 3. "Could you describe the typical onboarding process for a new team member in this role?"**
- 4. "What are the company's most significant strategic priorities for the upcoming fiscal year?"**

Beyond the Basics: Advanced Interview Strategies

While mastering these common questions is essential, consider these advanced techniques to truly stand out:

The STAR Method Reinforcement

As mentioned, the STAR method is invaluable for behavioral questions. Practice using it consistently for any question that asks you to recount an experience.

Quantify Your Achievements

Whenever possible, use numbers and data to back up your claims. Instead of saying "I improved customer satisfaction," say "I implemented a new customer feedback system that led to a 20% increase in customer satisfaction scores."

Tailor Your Answers

Never use generic answers. For every interview, research the company and the specific role thoroughly. Then, customize your responses to align with their needs, values, and culture.

Show Enthusiasm and Positive Body Language

Your attitude is as important as your answers. Maintain eye contact, offer a firm handshake, sit up straight, and smile. Enthusiasm is contagious!

Follow Up Effectively

Always send a thank-you note or email within 24 hours of the interview. Reiterate your interest, mention something specific you discussed, and briefly restate why you're a good fit. This reinforces your professionalism and keeps you top-of-mind.

Conclusion: Preparation is Your Powerhouse

Job interviews can be daunting, but with thorough preparation, strategic thinking, and a confident approach, you can transform them into opportunities to shine. By understanding the interviewer's intent behind common job interview questions, practicing your answers using frameworks like STAR, and tailoring your responses to each unique opportunity, you significantly increase your chances of securing that coveted position. Remember, every interview is a learning experience. Analyze your performance, seek feedback, and keep refining your approach. Your next great career move awaits!

No	Question	Answer
1	What's the best way to answer 'Tell me about yourself' without rambling?	Focus on a concise, relevant summary that highlights your experience, skills, and career aspirations as they relate to the job. Think of it as your elevator pitch: start with your current role/most recent experience, briefly touch on key achievements, and then connect it to why you're excited about this specific opportunity.
2	How should I prepare for behavioral questions like 'Tell me about a time you failed'?	Use the STAR method (Situation, Task, Action, Result). Clearly describe the situation, the task you needed to accomplish, the specific actions you took, and the positive outcome or lesson learned. Be honest, focus on what you learned, and demonstrate your problem-solving and resilience.
3	What are some common 'weakness' questions, and how can I answer them effectively?	Instead of a generic weakness, choose something genuine but not critical to the role. For example, 'I used to struggle with delegating tasks, but I've learned to trust my team and focus on clear communication to ensure projects are completed efficiently.'
4	How can I demonstrate my problem-solving skills during an interview?	When asked about challenges or complex projects, walk the interviewer through your thought process. Explain how you identified the problem, analyzed it, explored potential solutions, made a decision, and implemented it. Highlight your analytical skills and your ability to think critically.
5	What are good questions to ask the interviewer at the end of the interview?	Ask questions that show your engagement and research. Examples include: 'What does a typical day look like in this role?', 'What are the biggest challenges someone in this position might face?', 'How does the team collaborate on projects?', or 'What are the opportunities for professional development here?'
6	How can I make sure my resume and cover letter accurately reflect my interview answers?	Ensure consistency by reviewing your application materials before the interview. Use keywords from the job description in both your resume and cover letter, and be prepared to elaborate on those points during the interview.
